RESEARCH INTERESTS	Video Analysis, Computer Vision, Deep Learning, Machine learning, and Reinforcement Learning.	
EDUCATION	Indraprastha Institute of Information Technology, Delhi (IIIT-Delhi) PhD candidate, Computer Science and Engineering, CGPA: 8.14 Thesis: Analyzing Day Long Egocentric Videos Advisor: Dr. Chetan Arora	2016–Present
	Indian Institute of Information Technology, Allahabad (IIIT, Allahabad) M.Tech., Information Technology, CGPA: 8.65 Thesis: Human Action Recognition Advisor: Dr. Anupam Agarwal	2012–2014
	Mahakal Institute of Information Technology, Ujjain B.Tech., Computer Science and Engineering, Percentage: 70 Project: Hotel Management website Advisor: Pradeep Rupalia	2007–2011
PUBLICATIONS	Pravin Nagar , Anuj Rathore, C. V. Jawahar, and Chetan Arora. “Generating Personalized Summaries of Day Long Egocentric Videos” under second major revision in PAMI 2020.	
	Pravin Nagar , Mansi Khemka, and Chetan Arora. “Concept Drift Detection for Multivariate Data Streams and Temporal Segmentation of Daylong Egocentric Videos.” <i>Proceedings of the 28th ACM International Conference on Multimedia (ACMMM)</i> . 2020.	
	Anuj Rathore*, Pravin Nagar* , Chetan Arora, and C.V. Jawahar. “Generating 1 Minute Summaries of Day Long Egocentric Videos.” <i>Proceedings of the 27th ACM International Conference on Multimedia (ACMMM)</i> . 2019. (* both authors contributed equally)	
	Sagar Verma, Pravin Nagar , and Chetan Arora. “Making third person techniques recognize first-person actions in egocentric videos.” <i>25th IEEE International Conference on Image Processing (ICIP)</i> . 2018.	
	Pulkit Kumar, Pravin Nagar , Anubha Gupta and Chetan Arora. “U-Segnet: fully convolutional neural network based automated brain tissue segmentation tool.” <i>25th IEEE International Conference on Image Processing (ICIP)</i> . 2018.	
WORK EXPERIENCE	Pravin Nagar , Anupam Agrawal. “Geometric invariant model based human action recognition.” <i>9th International Conference on Industrial and Information Systems (ICIIS)</i> . 2014.	
	PSIT Kanpur, India Assistant Professor Taught Artificial Intelligence, Software Project Management and E-Commerce.	Jul, 2014–Dec, 2015

TEACHING ASSISTANT	CSE507-Database System Implementation	Winter 2016
	CSE201-Advance Programming	Monsoon 2016
	CSE561-Probabilistic Graphical Models	Winter 2017
	CSE543-Machine Learning	Monsoon 2017
	CSE561-Probabilistic Graphical Models	Winter 2019
	CSE642-Advanced Machine Learning	Monsoon 2019
	CSE641-Deep Learning	Winter 2020
	CSE562-Advanced Computer Vision	Monsoon 2020
POSITIONS OF RESPONSIBILITY	Participated and Member of organizing committee for ‘Intelligent Interactive Technologies and Multimedia (IITM)’.	Mar, 2013
	System Administrator, CVML lab, IIIT-Delhi	Aug, 2018 - Present
RESEARCH PROJECTS	Realtime face recognition using Deep learning.	
	<i>Advisor: Dr. Chetan Arora</i>	Jul, 2017 - Dec, 2017
	We use a Deep Learning based architecture for face detection and then a small inception based archicture is proposed for real time face recognition. For training we have collected the data of seven person. Our model detects and recognizes face on real time on each frame of video.	
	Smart Messenger.	
	<i>Advisor: Dr. Saket Anand</i>	Aug, 2016 - Jan, 2017
	In this work we propose a smart messenger to classify emotions on the basis of short text messages, thus setting background color of the message to the color assigned to the particular emotion. The state-of-the-art accuracy on ISEAR dataset for five emotions classes is 64.47% from Microsoft research. We defeat their accuracy by two differnent deep learning models and got 82% accuracy.	
	Geometric Invariant Human Action Recognition.	
	<i>Advisor: Dr. Anupam Agarwal</i>	Jun, 2013 - May, 2014
	Proposed a geometric invariant like rotation, scaling and transformation invariant action recognition system. We have used R-transform which is the extension of radon transform for feature extraction. We use Principal Component Analysis(PCA) and Linear Discriminant Analysis (LDA).We have reported 87% accuracy on Weizmann dataset comprises 90 video sequences of 10 action classes.	
	Face recognition using PCA, LDA, ANN, and RBFNN.	
	<i>Advisor: Dr. Sudip Sanyal</i>	Aug, 2013 - Jan, 2013
	We have used various naive methods to recognise faces and campare them. We have used Principal Component Analysis(PCA), Linear Discriminant Analysis(LDA), Artificial Neural Network(ANN) and Radial Basis Function Neural Network.	
	Programming Languages	
	Python, Java, C, C++.	
	Tools and Technologies	
SKILLS	Tensorflow, PyTorch, Matlab, Caffe, OpenCV, Pandas, SciPy, L ^A T _E X.
